

TITLE OF INVENTION: METHOD FOR PRODUCING FLUOROOLEFIN COPOLYMER
SOLUTION AND METHOD FOR PRODUCING COATING COMPOSITION

ABSTRACT

To provide a method for producing a fluoroolefin copolymer solution, whereby good storage stability of the copolymer solution is obtainable, and coloration of the solution can be suppressed, and a method for producing a coating composition.

5 A method for producing a fluoroolefin copolymer solution, which comprises subjecting at least one fluoroolefin (a) and at least one monomer (b) other than the fluoroolefin (a) to a solution polymerization in an organic solvent in the presence of potassium carbonate and hydrotalcite.
