(54) Title: METHOD AND DEVICE FOR TRANSPORTING A MOLDED OBJECT

(57) Abstract: A method for transporting a molded object, in particular an ophthalmic lens, specifically a contact lens (CL), in which a molded object is lifted up from a supporting surface (1) and transported to a destination, such that the molded object is acted upon by a fluid so that it is lifted up from the supporting surface (1) and transported to the destination through a transport line (2).
