ABSTRACT

A BIOMETRICS PARAMETERS PROTECTED COMPUTER SERIAL BUS INTERFACE PORTABLE DATA STORAGE DEVICE AND METHOD OF PROPRIETARY BIOMETRICS ENROLLMENT

A biometric parameters protected computer serial bus interface portable data storage device which integrates the computer serial bus interface with biometric (Fingerprint) technologies to ensure data and information storage within the device are secured with personal biometrics information. The storage device acts as a portable hard disk which can be connected via computer serial bus interface onto any computer platform with computer serial bus host and only the user(s) with the authorized fingerprint bio-data can have access to the data stored in the device.
