CLAIMS

1. A confirming method of membership, comprising:

identifying, under a visible light, a physical arrangement of whole diamonds arranged in a single product~~, the physical arrangement designed to exhibit grace and beauty as a whole product~~;

identifying, under ultraviolet radiation, ~~an arrangement of a diamond or diamonds having~~a form of a blue fluorescence equal to or stronger than strong blue in ~~the physical arrangement of~~ the whole diamonds; and

~~distinguishing the single product including the whole diamonds having a~~confirming the membership if the form of the blue fluorescence equal to or stronger than strong blue coincides with the physical arrangement of~~, from a group of the single product at least partly including a diamond or diamonds not having a blue fluorescence equal to or stronger than strong blue in~~ the whole ~~blue~~ diamonds.

2. An ornamental device comprising:

a support of a product; and~~whole diamonds arranged in a single product in a specific physical arrangement designed to exhibit grace and beauty as a whole product,~~

diamonds fixed to the support and arranged without forming a letter or letters or a pattern,

the whole diamonds on the ~~single product~~support having a unified blue fluorescence equal to ~~or stronger than~~very strong blue when exposed to ultraviolet radiation~~, so that the whole diamonds on the single product form a clear visibility of the specific physical arrangement under a visible light, and form a blue visibility of the specific physical arrangement under ultraviolet radiation, wherein an arrangement of the blue visibility coincides with an arrangement of the clear visibility, the ornamental device excluding a diamond not having a blue fluorescence equal to or stronger than strong blue~~.
