## ABSTRACT

New esters derived from (RR,SS)-3-(2-dimethylaminomethyl-  
1-hydroxycyclohexyl)phenyl 2-hydroxybenzoate, analog to  
Tramadol, a process for obtaining them and the use of  
5 these compounds for the production of a medicament with  
analgesic properties.

These new products of general formula (I) exhibit an  
analgesic activity higher than that of tramadol.
