(54) Title: DATA SELECTION AND IDENTIFICATION

Figure 9

(57) Abstract: A method of selecting source data as part of a

process of source data extraction, the method being executed by one or more computer processors and including the steps of: selecting at least a first portion of the source data; and assigning a variable to the first portion of the source data to enable the first portion of the source data to be referred to and extracted using the variable by the one or more computer processors.
