- (54) Title: DEVICE FOR INSECT STIMULATION USING ELECTRODES

FIG. 9A

(57) Abstract: A device for use with an insect, eg., for insect stimulation using electrodes. The device includes: a base member; and two or more hooks, the two or more hooks being disposed at different sides of the base member, the two or more hooks each being a resiliently flexible hook. The device is detachably attachable to the insect by a wholly mechanical coupling of the two or more hooks with the insect. The device in a wholly mechanical coupling with the insect provides a surface electrode in pressed abutment with a neuromuscular site of the insect.
