ABSTRACT OF THE DISCLOSURE (FIG. 2)

"DISK APPARATUS AND FILTER FOR DISK APPARATUS"

A magnetic disk apparatus includes a casing having
a substantially hermetic structure, which houses
5 a magnetic disk, a motor, and a magnetic head.

A filter is arranged within the casing. The filter
includes an oxidizing agent containing oxidized metal
components and serving to oxidize gaseous components,
and a trapping agent subjected to the treatment with
10 an alkali, for trapping the acidic gas oxidized by
the oxidizing agent.
