

SHAPE DISCRIMINATION VISION ASSESSMENT AND TRACKING SYSTEM

ABSTRACT OF THE DISCLOSURE

A method of testing vision is provided. The method
5 comprises allowing a user to trigger operations of a
vision tester and employing a touchscreen display to
present different shapes to the user for vision self-
testing. The method further comprises causing the
different shapes to be displayed at different locations,
10 orientations, and modulations on the touchscreen display
and receiving user input responses to the different
shapes via the touchscreen display.
