

ABSTRACT

Embodiments of the disclosure provides an interaction method for live streaming and a terminal device. The method includes: receiving a first input including an input for a live streaming interface; displaying, in the case that a live streaming login account corresponding to the live streaming interface has at least one interaction resource, an interaction resource list according to the at least one interaction resource; receiving a second input including an input for a target interaction resource in the interaction resource list; and in response to the second input, publishing target interaction information corresponding to the target interaction resource in a live streaming room corresponding to the live streaming, so as to present a resource operation page corresponding to the target interaction resource in response to receiving an input for the target interaction information. The present disclosure enriches the interaction experience of live streaming.
