(54) Title: DISSOLVABLE FILMS CONTAINING HIGH CONCENTRATIONS OF NONIONIC SURFACTANTS SUCH AS POLYSORBATES TO ENHANCE HIGH SOLID LOADINGS

(57) Abstract: An oral care composition and method are described in which the composition includes a film or a plurality of film fragments entrained in a carrier. The film or plurality of film fragments comprises a relatively high concentration of nonionic surfactants. The composition and methods provide benefits including higher active material loading in the film formula for improved efficacy, and a reduced amount of film needed in a product, which at the same time delivering comparable or improved efficacy with lower loading of the film in the composition
