(54) Title: ELECTRONIC PUNCHING BAG SYSTEM PROVIDED WITH AN ANCHORING UNIT

Figure 1

(57) Abstract: The present application describes an electronic punching bag (1) provided with an anchoring unit, that is projected to restrict the horizontal movements of the bag (1), produced in reaction to a strike inflicted by the user. The anchoring unit is comprised by the following elements: a base module (2) configured to anchor a first coupling section of the punching bag (1), an attachment module (3) configured to anchor a second coupling section of the punching bag (1), and a supporting stand (4) coupled to the attachment module (3), such that said supporting stand (4) and the base module (2) being adapted to vertically support the punching bag (1) on at least a first supporting surface (6).
