(54) **Title:** FORM FILLING METHOD AND RELATED TERMINAL

FIG. 1

(57) **Abstract:** A form filling method and related terminals are disclosed. The method includes scanning, by a first terminal, a digital object identifier generated by a second terminal; acquiring an operational source identifier of a form to be filled and item(s) to be filled from the digital object identifier; acquiring information content(s) corresponding to the item(s) to be filled from a pre-stored correspondence relationship between the information item(s) and the information content(s) and/or through an auxiliary device of the first terminal; and sending the information content(s) corresponding to the item(s) to be filled and the operational source identifier to a first server correspondingly, to enable the second terminal to acquire the information content(s) corresponding to the item(s) to be filled from the first server based on the operational source identifier to fill in the form.
