

ABSTRACT

Disclosed are an operation control method and apparatus, and an electronic device and a storage medium. The method comprises: a terminal displaying a target button in a graphical user interface (301); when a touch control operation on the target button is detected, the terminal acquiring the type of virtual prop controlled by a current virtual object (302); determining a display mode switching function and a target function to be triggered in a shooting function and a target mode corresponding to the target function; and based on the target mode, executing the target function in the graphical user interface.
