(54) Title: SUPPORT FOR A UNIT DOSE DRUG

(57) **Abstract:** A support for a unit dose drug comprises a relatively rigid planar body (11) which is elongate in shape in a first direction and has a thickness which is relatively smaller in relation to a surface area. On one portion of said surface area is provided an accommodation area for a unit dose drug (F), which area is completely displaced to one side relative to a midline (M-M) of the surface area, transverse of said first main direction. A hole (14) is provided for hanging the drug support on a peg of a unit dose drug store. A machine and method for manufacturing said drug support is also disclosed.

FIG. 10
