What claimed is:

1. A cyano-substituted cyclic hydrazine derivative, wherein the cyclic hydrazine derivative is a compound with the following structure:

,

,

,

,

,

,

, or

,

or a stereoisomer, geometric isomer, tautomer, racemate, hydrate, solvate or pharmaceutically acceptable salt thereof.

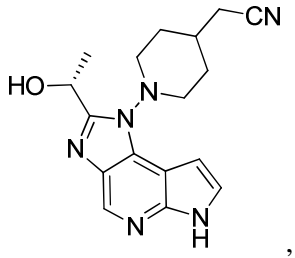

2. The cyano-substituted cyclic hydrazine derivative of claim 1, wherein the cyclic hydrazine derivative is a compound with the following structure:

,

or a stereoisomer, geometric isomer, tautomer, racemate, hydrate, solvate, or pharmaceutically acceptable salt thereof.

3. The cyano-substituted cyclic hydrazine derivative of claim 1, wherein the

cyclic hydrazine derivative is a compound with the following structure:

,

or a stereoisomer, geometric isomer, tautomer, racemate, hydrate, solvate, or pharmaceutically acceptable salt thereof.

4. A pharmaceutical composition comprising the cyano-substituted cyclic hydrazine derivative of any of claims 1 to 3 and at least one of pharmaceutically acceptable carriers, excipients, diluents, adjuvants or vehicles;

wherein, the amount of the cyano-substituted cyclic hydrazine derivative is 0.01-99.9% of the total mass of the pharmaceutical composition.

5. The pharmaceutical composition of claim 4, wherein the pharmaceutical composition contains additional therapeutic agents, and the additional therapeutic agents are selected from anti-inflammatory drugs, immunomodulators or immunosuppressive agents, neurotrophic factors, active agents for treating cardiovascular diseases, active agents for treating diabetes and active agents for treating autoimmune diseases.

6. Use of the compound of any one of claims 1 to 3 or the pharmaceutical composition of claims 4 or 5 in the preparation of a medicament, wherein the medicament is to be used for treating or alleviating autoimmune diseases or proliferative diseases of a patient.
