(54) **Title:** A TRAINING DEVICE AND A SYSTEM FOR A FIREARM WEAPON, A METHOD FOR CONTROLLING THE TRAINING DEVICE, AND USE OF SUCH DEVICE AND SYSTEM

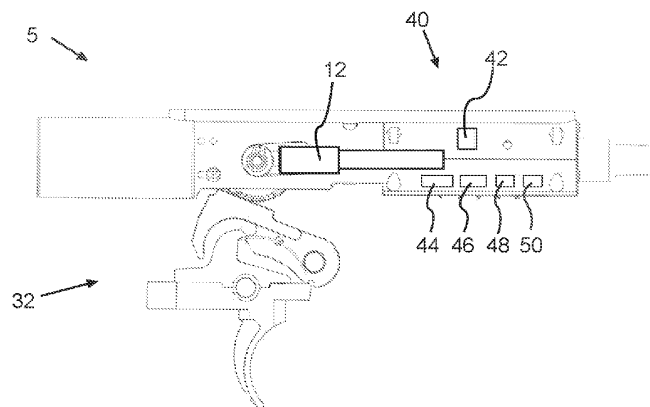

Fig. 4a

(57) **Abstract:** A training device (5) for a firearm weapon (1). The weapon comprises a bolt assembly (10a) comprising a movable bolt configured to act on an ammunition round. The device comprises a blank bolt assembly (10) configured to replace the bolt assembly of the weapon. The blank bolt assembly comprises a movable blank bolt (12). The device further comprises a sensor arrangement (40), a clock unit (46), a memory unit (50) and a logic unit (48) configured to receive information from the sensor arrangement and the clock unit. The sensor arrangement comprises a blank bolt sensor unit (42) and a motion sensor (44). The logic unit is configured upon receipt of the information on an event of a detected motion of the blank bolt to gather and store information into an information package comprising the position and orientation of the weapon together with time information.
