(54) Title: A FOIL CUTTER IN A DRY POWDER INHALER AND A METHOD FOR CUTTING OPEN A CONTAINER

(57) Abstract: An improved foil-cutting device is disclosed for opening a foil protecting a pre-metered dose of medication power carried by dose carrier to be used in an inhaler device. The dose carrier with the medication powder is covered by a seal, e.g. metallic or plastic foil. The foil-cutter device of the present invention provides a knife device tool for simultaneous access of a selected sealed dose of medication powder during an inhalation process using a dry powder inhaler (DPI).
