

GAME SYSTEM

Abstract

5 An object of the present invention is to provide an environment
in which many players can play conveniently regarding one game table.

 A game system 100 for participating in a baccarat game includes
a bet area 124 includes: a plurality of betting terminals 102
separated from the game table, including a plurality of bet targets
10 including a player win area and a banker win area, and in which a
bet is performed by placing a physical token at any of the bet
targets; a bet determining device 23 configured to determine a bet
target at which the physical token is placed and an amount thereof;
and a collecting device 29 and a payment device 32 configured to
15 collect the betted physical token or pay out for the betted physical
token based on the bet target and the amount determined by the bet
determining device 23 and a result of a baccarat game.
