(54) Title: DYNAMIC NEGOTIATION OF SECURITY ARRANGEMENTS BETWEEN WEB SERVICES

(57) Abstract: The present invention relates to computer-based devices and methods negotiate and implement security arrangements between two or more web services. More particularly, it relates to devices and methods that specify input and output interfaces, computation and generation of a security contract consistent with inputs, and implementation of security in accordance with negotiated security arrangements. Particular aspects of the present invention are described in the claims, specification and drawings.
