

ABSTRACT**ASSEMBLY SET OF ASSEMBLY-TYPE PLANTING CONTAINER AND
ASSEMBLY-TYPE PLANTING CONTAINER**

The disclosed assembly-type planting container (210) is provided with: bottom plate
5 pieces (221) having a fitting part on the top surface of the main plate, which is a rectangular
plate; side plate pieces (231) having a bottom plate joining piece (225) with a joining unit on
the bottom surface and having a fitting part on the top and bottom of the main plate, which is a
rectangular plate; inter-side plate auxiliary pieces (241) having a height corresponding to that
of said side plate pieces (231) and having a fitting part on the top and bottom; and top joining
10 pieces (250) having a fitting part on the bottom. The assembly-type planting container (210) is
assembled by erecting the side plates around the circumference of the bottom plate parts (221)
by alternately fitting together the side plate pieces (231) and the inter-side plate auxiliary
pieces (241) by means of the respective fitting parts thereof, and by fitting the top joining
pieces (250) on top of the area neighboring the side plate pieces (231) and the inter-side plate
15 auxiliary pieces (241) by means of the respective fitting parts.
