(54) Title: SYSTEMS AND METHODS FOR CONDUCTING EMI SUSCEPTIBILITY TESTING

(57) Abstract: System and methods for performing EMI susceptibility testing of a device is disclosed. A system may include an EMI generation unit that includes a plurality of EMI generating devices, where each EMI generating device generates EMI having substantially similar characteristics relative to EMI generated by other EMI generating devices in the system. Each EMI generating device is controlled by a controller that is configured to emulate at least partly a live cellular network.
