

ABSTRACT

AQUARIUM ADAPTED TO BE HUNG ON A STATIONARY WALL

An aquarium includes a container 10 and a hanging unit for hanging the same on a stationary wall. The container includes a vertical rectangular rear wall 10a, a horizontal rectangular bottom wall 10b, two trapezoid side walls 10c, and a downwardly and rearwardly inclined rectangular front wall 10d with a transparent piece 20 fitted sealingly therein. Each of the trapezoid side walls 10c has a vertical rear side 101 coupled with the rear wall 10a, a horizontal bottom side 102 coupled with the bottom wall 10b, a horizontal top side 103 which is longer than the bottom side 102, and an inclined front side 104 coupled with the front wall 10d. A decorative frame 13 is attached around the container 10 in such a manner that a portion of the transparent piece 20 is exposed from the decorative frame 13.
