

ABSTRACT

For dementia, particularly Alzheimer's disease, there is currently no effective agent for ameliorating or treating it. The object of the present invention is to find a drug for ameliorating or treating dementia thereby providing a novel agent for ameliorating or treating dementia. The present invention provides an agent for ameliorating or treating dementia, which comprises cyclic phosphatidic acid, carbacyclic phosphatidic acid, thiacyclic phosphatidic acid, or carba-lysophosphatidic acid, or a salt thereof.
