

IMAGING SYSTEM, IMAGING METHOD, AND NON-TEMPORARY
COMPUTER-READABLE MEDIUM STORING IMAGING PROGRAM

ABSTRACT

5 An imaging system (10) according to the disclosure includes: a first
control unit (11) configured to control, in such a way as to fix a focal position in
a predetermined position, an iris imaging means for capturing an image focusing
on an iris of a target person; an authentication unit (12) configured to authenticate
the target person, based on an iris image of the target person being captured by
10 the iris imaging means controlled by the first control unit (11); and a second
control unit (13) configured to control the iris imaging means in such a way as to
scan a focal position in a predetermined range, in order to re-authenticate the
target person when authentication of the target person fails.
