

Abstract

Disclosed in the embodiments of the present disclosure are a text input method and apparatus, and an electronic device and a storage medium. The method comprises: on the basis of a video to be edited, determining at least two recommended text items; displaying the at least two recommended text items in a first target area of an editing page of said video; and in response to a first trigger operation acting on a first recommended text item, displaying, in a text input area of the editing page, a first text that is comprised in the first recommended text item, wherein the first trigger operation is used for determining the selected first recommended text item from the at least two recommended text items.
