(54) Title: MESH CONTAINER, SYSTEM USING MESH CONTAINERS, AND METHOD FOR MAKING MESH CONTAINERS

(57) Abstract: The present invention is directed to a container (14B) formed from a first piece of mesh material and at least one separate second piece of mesh material. The first piece of mesh is bent to form a bottom wall (56) and a first pair of sidewalls (58, 60). The second piece of material forms a second pair of sidewalls (62). When the pieces are joined together, a basket portion with an upwardly extending opening is formed. The basket portion may further include a runner portion that may be a separate rail (54) connected to the basket portion, thus forming a drawer.
