

Title of Invention: DOCTORING UNIT FOR A PRINTING APPARATUS

ABSTRACT

The invention relates to a doctoring unit (4) for a printing apparatus (2) for printing flat substrates, in particular circuit boards, wafers, or solar cells, comprising two doctor blades (5,6), which extend
5 parallel to one another and are pivotably mounted. It is provided that the doctor blades (5,6) are operatively connected to a gearing (35), which is formed in a self-locking manner and can be coupled or is coupled to a drive device (22).
