(54) Title: POLYETHYLENE GLYCOL TREATED CARBON BLACK AND COMPOUNDS THEREOF

(57) Abstract

A treated carbon black may be produced by treating carbon black with at least one polyethylene glycol having a molecular weight of from about 1,000 to about 1,000,000. The treated carbon black may be used in forming polymeric compositions, such as semi-conductive and insulating compounds, for example for use in electrical cables.
