(54) Title: TOKEN BASED SYSTEM FOR VALUE TRANSFERS

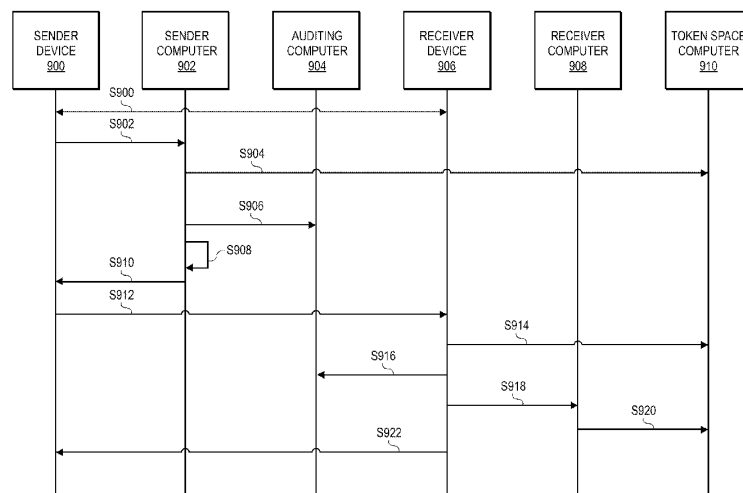

FIG. 9

(57) Abstract: A method is disclosed. The method comprises generating, by sender device or a sender computer associated with a sender, a base token in a token space associated with parameters. The base token can comprise one or more token attributes within the parameters, and an amount. The base token can then be signed, by the sender device or the sender computer, to form a minted token. The method may then include transmitting, by the sender device to a receiver device, a transfer request comprising the minted token.
