ABSTRACT

The present disclosure relates to an aromatic amide derivative, a preparation method therefor, and the use of a pharmaceutical composition containing the derivative in medicine. Specifically, the present disclosure relates to an aromatic amide derivative as shown in formula (I), a preparation method therefor and a pharmaceutically acceptable salt thereof, and the use thereof as a therapeutic agent, in particular a DHX9 inhibitor, wherein the definition of each substituent in formula (I) is the same as defined in the specification.
