

ABSTRACT OF THE DISCLOSURE

LABELING AN OPTICAL DISC

5

Methods for generating a curved raster image are disclosed. The method includes providing a rectangular raster image, defining a curved raster geometry and coordinate system on a curved track, thus forming a curved
10 raster, and tracing along the curved raster to define a plurality of data locations. The method further includes computing curved raster data for each of the plurality of data locations from the rectangular raster image, thus creating the curved raster image.
