(54) **Title:** CONVERSION METHOD FOR MULTIMEDIA EDITING FILE, APPARATUS, DEVICE, AND MEDIUM

(54) 发明名称: 多媒体编辑文件的转换方法、装置、设备及介质

图 1

- S110 Acquire a first multimedia editing file, wherein the first multimedia editing file is used for indicating an editing project for performing an editing operation on a multimedia material, first indication information for indicating the multimedia material and second indication information for indicating the editing operation are encapsulated, according to a first data format, in the first multimedia editing file, and the first data format is a data format supported by a first application
- S120 Analyze the first multimedia editing file to obtain the first indication information and the second indication information
- S130 According to a second data format, encapsulate the first indication information and the second indication information into a second multimedia editing file, wherein the second multimedia editing file is used for indicating the editing project, and the second data format is a data format supported by a second application

(57) **Abstract:** Provided are a conversion method for a multimedia editing file, an apparatus, a device, and a storage medium. In the method, a multimedia material and an editing operation of a multimedia editing file are indicated by means of different indication information, and the indication information is encapsulated into a data format which can be supported by each application program itself, so that conversion of multimedia materials and editing operations having relatively large data volumes is not needed, thus achieving file format conversion between different application programs by means of converting the indication information. The conversion mode is

easy to implement and has high conversion efficiency, and likewise supports conversion of multimedia editing files occupying large
memory in different application programs, thereby improving the reliability and universality of multimedia file conversion.

(57) 摘要: 本公开提供了一种多媒体编辑文件的转换方法、装置、设备及存储介质, 在该方法中, 多媒体编
辑文件的多媒体素材和编辑操作通过不同的指示信息进行指示, 并且将指示信息封装成各个应用程序自
身能够支持的数据格式, 无需转换数据量较大的多媒体素材和编辑操作, 实现通过转换指示信息的方式
在不同应用程序进行文件格式转换, 这种转换方式易于实现并且转换效率高, 同样也能支持在不同应用程
序对内存占用较大的多媒体编辑文件进行转换, 提高了多媒体文件转换的可靠性和普适性。
