

[ABSTRACT]

A grinding device (G) of a travel path (11), on which traveling wheels of a rail-type vehicle roll, includes a grinder (20) which grinds a surface layer of a travel path (11), a frame (30) on which the grinder (20) is provided, and a device traveling wheel (80) mounted on the frame (30). The device traveling wheel (80) rolls along the travel path (11) on the top surface (18u) of the standard rail (15) extending in the extending direction (De) of the travel path (11).
