ABSTRACT

An integrated learning system 10 including at least a content creation sub-system, a content delivery sub-system and a content consumption management sub-system.

5 In particular forms the content creation sub-system includes a content builder 11 adapted to generate single-format content 12 from content initially stored in varying formats.

In a particular form the content delivery sub-system includes a browser interface 17 which includes a link 18 to
10 content 12.

In a particular form the content consumption management sub-system may incorporate a user usage profile store 26 which monitors and stores data pertaining to usage by a user of content
12.
