(54) Title: POINT OF CARE SAMPLE PROCESSING DEVICE

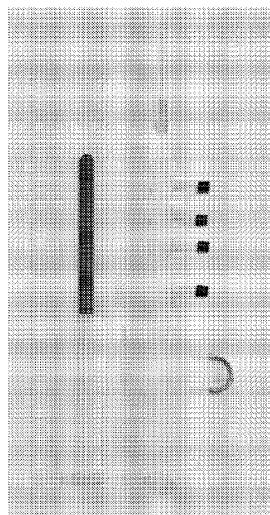

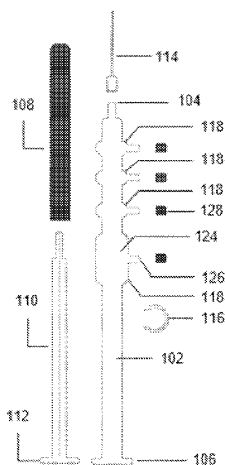

Figure 1

(57) Abstract: This disclosure concerns a point of care device for sequential processing of liquid samples. The device comprises a syringe barrel having a body with a proximal end, a distal end for receiving a liquid sample, and a plurality of holding chambers formed in the body for holding sample processing material, and at least one stopper slidably disposed within the barrel body and configured to fluidically seal the plurality of holding chamber. The at least one stopper is operable to sequentially unseal the plurality of holding chambers to bring liquid sample that is received at the distal end of the syringe barrel into contact with sample processing materials in the plurality of holding chambers.
