CLAIMS

What is claimed is:

1. An analgesic pharmaceutical preparation for use in treating pain in a subject in need, comprising a therapeutically effective amount of a first analgesic agent which is sebacoyl dinalbuphine and a therapeutically effective amount of a second analgesic agent which is acetaminophen (AAP), together with one or more pharmaceutically acceptable excipients.

2. The analgesic pharmaceutical preparation of claim 1, wherein the one or more pharmaceutically acceptable excipients are selected from the group consisting of Eudragit S100, dicalcium phosphate dehydrate, Pluronic F68, hexitol, Crospovidone, Sodium starch glycolate, Aerosil 200, trichlorosucrose, menthol, Saccharin, Sodium benzoate, Glyceryl behenate, Sodium lauryl sulfate, Providone K30 and any combination thereof.

3. The analgesic pharmaceutical preparation of claim 1, which provides a synergistic analgesic effect when compared to the first analgestic agent or the second analgestic agent alone.

4. The analgesic pharmaceutical preparation of claim 1, wherein the first analgesic agent is sebacoyl dinalbuphine in the free base form or a pharmaceutically acceptable salt.

5. An analgesic pharmaceutical preparation for use in treating pain in a subject in need, comprising

(i) a first analgesic composition comprising a therapeutically effective amount of a first analgesic agent which is sebacoyl dinalbuphine; and

(ii) a second analgesic composition comprising a therapeutically effective amount of a second analgesic agent which is acetaminophen.

6. The analgesic pharmaceutical preparation of claim 5, which comprises one or more pharmaceutically acceptable excipients selected from the group consisting of Eudragit S100, dicalcium phosphate dehydrate, Pluronic F68, hexitol, Crospovidone, Sodium starch glycolate, Aerosil 200, trichlorosucrose, menthol, Saccharin, Sodium benzoate, Glyceryl behenate, Sodium lauryl sulfate, Providone K30 and any combination

thereof.

7. The analgesic pharmaceutical preparation of claim 6, further comprising one or more additional excipients as a carrier as the balance.

8. The analgesic pharmaceutical preparation of claim 5, wherein the amount of the first analgeic agent is 1~1000 mg, wherein the amount of the second analgeic agent is 100~1000 mg.

9. The analgesic pharmaceutical preparation of claim 5, which provides a summation / synergistic analgesic effect.

10. The analgesic pharmaceutical preparation of claim 5, wherein the first analgesic agent is sebacoyl dinalbuphine in the free base form or a pharmaceutically acceptable salt.

11. The analgesic pharmaceutical preparation as recited in any of claims 1-10, wherein the analgesic pharmaceutical preparation is in the form of gel, spray, emulsion, pastilles, dispersible tablets, tablets, enteral coated, capsules, soft capsules, granules, suspensions, microspheres, oral implants, intramuscular injection, intravenous injection, implantable injections, modified release and other pharmaceutically acceptable forms.

12. Use of an analgesic pharmaceutical preparation of any of claims 1-11 in the manufacture of a pharmaceutical composition for treating pain in a subject in need wherein the pharmaceutical composition is to be administered to the subject in need.

13. Use of an analgesic pharmaceutical preparation of any of claim 1-11 for manufacturing a medicament for treating pain in a subject in need.
