(54) Title: AMINO ACID DERIVATIVES OF SUBSTITUTED QUINOXALINE 2,3-DIONE DERIVATIVES AS GLUTAMATE RECEPTOR ANTAGONISTS

(57) Abstract

A novel series of substituted quinoxaline 2,3-diones useful as neuroprotective agents are taught. Novel intermediates, processes of preparation, and pharmaceutical compositions contaning the compounds are also taught. The compounds are glutamate antagonists and are useful in the treatment of stroke, cerebral ischemia, or cerebal infarction resulting from thromboembolic or hemorrhagic stroke, cerebral vasospasms, hypoglycemia, cardiac arrest, status epilepticus, perinatal asphyxia, anoxia, Alzheimer's, Parkinson's, and Huntington's diseases.
