ABSTRACT OF THE DISCLOSURE

REMOVABLE COMPONENT FILLER

A cost effective and easily manufactured filler (502, 504, 506, 508, 512, 514, 515, 516) for a removable system component. A hard disk drive filler embodiment is disclosed having five exterior sides (502, 504, 506, 508) and internal baffles (514, 515, 516) to simulate the airflow modifying characteristics of a hard disk drive. The hard disk drive filler is stackable, flame-resistant, and is manufactured by an injection-molding process.
