

ABSTRACT

A refrigerator (1) includes a vegetable compartment (15), a vegetable storage case (4) provided in the vegetable compartment (15), and a light emitting device (5) provided in the vegetable compartment (15). The light emitting device (5) has LEDs (51a to 53b) as a light emitting part having an optical axis (Ax) tilted downward with respect to a horizontal plane, and the LEDs (51a to 53b) emit light toward an inside of the vegetable storage case (4).
