

ABSTRACT OF THE DISCLOSURE

162162

CONDUCTIVE SHEET, PROCESS FOR PRODUCING THE SAME, AND MOLDED
ARTICLE

5

To provide a conductive resin sheet which does not release carbon due to friction on the surface of the sheet and which has an excellent conductivity maintaining property and exhibits stable conductivity even at a portion which is stretched in a molding process or the like, a thermoplastic resin layer containing a conductive filler is laminated over at least one side of a thermoplastic resin sheet base, and a conductive coating is further applied.
