(54) **Title:** BLUE/VIOLET DIPHENYLANTHRACENE CHEMILUMINESCENT FLUORESCERS

(57) **Abstract:** Compounds are disclosed for the production of chemiluminescent light, particularly for the production of blue/violet light within the range of about 390nm to less than 438 nm, and most particularly to the use of compounds composed of symmetrically and asymmetrically substituted anthracenes which are effective for increasing the production of such blue/violet light when used as fluorophores in conjunction with chemiluminescent systems. These systems utilize derivatives of 9,10-diphenylanthracene containing one or more fluorines As shown in General Formulae (1-3). The variables shown in Formulae (1-3) are defined in the specification.
