DISPENSING PRODUCTS FOR PERSONAL CARE TREATMENT

CROSS-REFERENCE TO RELATED APPLICATIONS

[0001] This application claims priority to U.S. Provisional application serial number 61/847,214, filed on July 17, 2013, the complete contents of which are herein incorporated by reference.

BACKGROUND OF THE INVENTION

1. Field of the invention.

[0002] The invention relates to methods, systems and apparatus for dispensing products for a personal care, and more particularly to a method, system and apparatus, for facilitating the dispensing of personal care products, such as a beauty product, such as, for example, a hair colorant, where the hair colorant components are delivered in a dosage to provide a resultant hair colorant product having the desired characteristics. The invention also may be configured to dispense shampoo, conditioner, skin and scalp treatments, and other beauty and personal care products.

2. Brief Description of the Related Art.

[0003] Beauty treatments often involve the use of products to enhance, repair or rejuvenate the skin, hair or body of an individual to improve or change the appearance or characteristic of the individual. One example of a beauty treatment involves hair coloring. Hair coloring compositions are used for coloring human hair. They may be applied by individuals in the home, or professionally in salons and studios. The purpose of hair coloring is to bring about a particular look with the color, which, for some individuals, may involve returning graying hair to its original color, and, for others, may involve altering the
