

Title of Invention: CYCLOHEXYLENEDIAMINIUM SALT, USE
THEREOF, AND MSE-TYPE ZEOLITE OBTAINED THEREFROM

Abstract

Provided is at least one of a novel cyclohexylenediaminium salt, a producing method therefor and use thereof, and an MSE-type zeolite obtained by using the same. An MSE-type zeolite having the following powder X-ray diffraction peaks.

[Table 1]

d (Å)	Relative peak intensity (%)
9.18±0.21	30~400
4.45±0.04	10~100
4.32±0.08	10~70
4.12±0.03	50~500
4.05±0.03	84~200
3.97±0.04	50~150
3.84±0.08	100
