

ABSTRACT

METHOD FOR REMOVING COATING FROM COATED FILM AND EQUIPMENT
FOR REMOVING COATING

5

Provided are coating film removing method and a coating film removing equipment that can efficiently remove a coating film from a surface of a coated film including a coating film containing a water-soluble resin by using a very small amount of solvent. A method for removing a coating film from a coated film according to the present invention is a method for removing a coating film from a coated film including a coating film containing a water-soluble resin on at least one side of a base film. The method is characterized in that a cleaning liquid in the form of droplets is supplied to a surface of the coating film, the cleaning liquid is retained in the form of droplets on the surface of the coating film, and then the coating film containing the cleaning liquid is removed off from the coated film.
