APPARATUS FOR CONTROLLING ELECTRIC PROGRAMING GUIDE AND METHOD FOR THE SAME

ABSTRACT

Program information can be obtained quickly and accurately. An area X1 on which date and day are displayed is disposed at the left end of a screen and an area X2 in which time is displayed is disposed adjacent to the area X1 in the right-hand side. An area Y in which title of program, etc., are displayed is disposed adjacent to the area X2 in the right-hand side. An area Z in which genre is displayed is disposed adjacent to the area Y in the right-hand side. Information displayed on the respective areas are sequentially arranged in the longitudinal direction. A user can select information of a desired program by moving cursors 100X1, 100X2, 100Y, 100Z of the respective areas.
