Claims:

1. A single serve capsule for producing a reduced-crema coffee beverage,

wherein the single serve capsule has a capsule base body in which a textile fabric and a beverage substance are arranged,

wherein the beverage substance is provided for storage in the single serve capsule and for extraction in the single serve capsule through the textile fabric by means of pressurized hot water,

wherein the beverage substance is present in the single serve capsule in an amount in the range from 1 to 20 g;

wherein the beverage substance is substantially pulverulent, comprises roasted, ground coffee which in the dry state has a D[4,3] value in the range from 100 to 800 μm;

wherein the textile fabric has a weight per unit area of at least 900 g/m^2;

wherein the textile fabric has an air permeability in the range from 160 to 500 l/(m^{2}s);and

wherein the capsule base of the single serve capsule is partially open, wherein the opening is closed by means of a seal which is perforable by means of perforating means or can be taken off manually from the capsule base.

2. The single serve capsule as claimed in claim 1, wherein the beverage substance is present in the

single serve capsule in an amount in the range from 4 to 11 g.

3. The single serve capsule as claimed in claim 1 or 2, wherein the beverage substance is substantially pulverulent, comprises roasted, ground coffee which in the dry state has a D[4,3] value in the range from 200 to 650 μm.
