(54) **Title:** METHOD, DEVICE AND SYSTEM FOR RETRIEVING RELEVANT POINT-OF-INTEREST DATA IN RESPONSE TO A SEARCH REQUEST

FIG. 1

(57) **Abstract:** Aspects concern a method for retrieving relevant point-of-interest data in response to a search request, the method comprising the steps of: associating at least one category to the search request; retrieving, from a database, a plurality of point-of-interest candidates, based on the associated at least one category; and determining the one or more relevant point-of-interest data from the plurality of point-of-interest candidates based on comparing the search request with each of the plurality of point-of-interest candidate, and calculating a corresponding similarity score for each point-of-interest candidate.
