(54) Title: MEDIA TIMELINE PROCESSING INFRASTRUCTURE

(57) Abstract: A media timeline processing infrastructure is described. In an implementation, one or more computer readable media include computer executable instructions that, when executed, provide an infrastructure having an application programming interface that is configured to accept a plurality of segments from an application for sequential rendering. Each of the segments reference at least one media item for rendering by the infrastructure and each segment is taken from a media timeline by an application.

**Declarations under Rule 4.17:**

- *as to applicant's entitlement to apply for and be granted a patent (Rule 4.17(ii))*
- *as to the applicant's entitlement to claim the priority of the earlier application (Rule 4.17(iii))*

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
