(54) Title: PROGRAMMING MANAGEMENT DATA FOR NAND MEMORIES

FIG. 7A

(57) Abstract: Methods, apparatus, systems, and data structures may operate to generate or store error correction data for (703,705,707) each of a plurality of sectors (702,704,706) of a page (700) except for a particular sector (708) in the page and combining a block management data with the particular sector (708) to generate a modified sector. Additionally, various methods, apparatus, systems, and data structures may operate to generate or store error correction data for the modified sector and combining the plurality of sectors, the error correction data (709) for each of the plurality of sectors other than the particular page, and the block management data and the error correction data for the modified sector.
